Additional Data: This building was erected by Henry Hitchcock during his ownership, between August 1835, and March 1836, and was one of three houses of the same type, two of which were erected on adjoining lots to the west, all three story wood frame and siding, massive round two story columns on front, and having cast iron porch balustrade between columns, on first and second story front. The structure next west, is said to have been the home of Henry Hitchcock for many years.

Superstructure rests on first story basement constructed of brick. Buildings are covered with slate roof. Some additions to rear were made some time after erection. A high brick wall runs around property on three sides and a brick stable and carriage building of two stories occupies space at the extreme rear, rear wall of which joins and serves as part of the rear property line wall.
